Nancy,

The turnaround times for the return of un-validated data for the various constituents varies widely. The longest turnaround time projected (for un-validated data) is over 30 calendar days. I believe Incident Command may want to look at release of data at some regular interval. I am leaving the decision up to them.

Do we have this timeline? The county is sure to ask. Thanks ng

Hi Dan,

I have asked the lab for the fastest possible turnaround time for each method, but have not received a response yet. I will let you know as soon as I do.

Thanks,

Moira Pryhoda

Hi Mark and everyone

As of this moment, it is my understanding that we will be collecting the sample without the county being present on Monday the 21<sup>st</sup>.

Althea would like to know about turn around times for these analyses. We would like these analyzed samples as fast as possible, but would also like to deliver a complete data package. When can we expect to receive all the results?

Thank You

**Subject:** GKM SAP/QAPP Addendum 5 - GKM Mine Adit Sampling

Dan and David,

Please find attached Addendum 5 to the SAP/QAPP for the Gold King Mine release response. This addendum addresses the collection of surface water and sediment from the Gold King Mine adit to be conducted in coordination with La Plata County. Also included is the collection of a dry shotcrete sample per the request of the County.

Thanks,

Mark
